

### Product Group MFANS

Anti vibration machine feet made of stainless steel with niche

#### Material

- Base body: AISI 304 (A2)
- Rubber: NBR 80 Shore

#### Product information

- The rubber of the machine base is 10 mm thick and the surface is infused with circular veins for optimum vibration damping.
- Machine tools, injection moulding units, shearing machines, vibrators, printing machines, etc. ...

#### Product options on inquiry

- For higher loads, a vibration-damping plate made of NBR with a hardness of 90 Shore can be supplied.
